

Solve It

My house number is 37. Abdul lives at number 22.

What is the difference between these numbers?

This problem is about

street names _____

house numbers _____

Coronation Street _____

I have to find

- The house number next door
- The last house number in the street
- How much bigger my house number is than Abdul's

This means I have to

+

-

X

My estimate for the answer is

between 10 and 20

between 20 and 40

between 40 and 50

Here is my calculation

How can I check it?
